

SSD

Superclean Standard Doublesided

BENEFITS

- > better yields
- > better quality
- > reduced down-time
- > rapid payback
- > improved profitability
- > optimum particle collection and retention
- > even 1µm (0.00004") particulate permanently removed
- > static neutralisation system

Film + Panel Cleaner Particulate Contamination Removal System

APPLICATION

- > Films + panels, sheet cleaning
- > Cleaning widths:
320, 622, 762, 1000mm
- > 'stand alone' or in-line
- > Flex material from 50 µm thick
- > Photographic film
- > PCB/PWB panels bare and laminated
- > inner-layers
- > Glass / Ceramics / Metals /
Plastics to 10mm thick
- > before coating
- > before laminating
- > before printing / exposure
- > before inspection / test
- > before stacking / packing

FEATURES

- > 28mm diameter
original **ksmsuperblue™**
particle transfer rollers
- > **ksmruntrue™** core chucks
(Patent Pending)
- > static neutralisation system
- > variable speed
- > Slimline profile, 135mm [5.3"]

ksmsuperclean®

The SSD range is only one of more than 20 original equipment designs by KSM SUPERCLEAN LTD, installed in over 40 countries around the world

SSD

Superclean Standard Doublesided

MACHINE	CLEANING WIDTH	OVERALL WIDTH
SSD 320	320mm / 12"	794mm / 32"
SSD 622	622mm / 24"	1096mm / 44"
SSD 762	762mm / 30"	1236mm / 49"
SSD 1000	1000mm / 39"	1474mm / 58"

OPTIONS

- > Particle transfer roller 'grab' level to suit material to be cleaned
- > simple variable speed or M-Logic plc control
- > panel counter with flashing beacon
- > stands to customer requirements
- > Conveyors to suit application
- > 200 / 240 V • 50 / 60 Hz • 0.5 amp
- > 100 / 120 V • 50 / 60 Hz • 1 amp
